

UPS Custom Integration (BROK_UPS_CUSTOM): Changing the method name that is displayed to the customer

Is it possible to change the method that is displayed to the customer in the drop down list of shipping methods during checkout?

Yes, in the **Drop down message** portion of the integration's main page in Merchant admin enter the message you wish to appear. If the **Append** option is selected, your message will be appended to the method name, e.g. if you want to display a usual delivery time for **UPS Ground** you can select the **Append** option and in the field for UPS Ground enter your message, such as: (2-4 days delivery). The method displayed to the customer will be: UPS Ground (2-4 days delivery). If you do not check the "Append" option the entire message will be replaced.

To display the cost of shipping in the customized message, use the token %cost%

e.g. Ground Shipping, 2-5 days delivery (%cost%)
